

# Randy Fry

Randel (Randy) Fry purchased Airco Industries, Inc in July 1997. He is the Chief Executive Officer and actively manages the sales department. Prior to Airco, Mr. Fry has been in the capital equipment business for 22+ years. Previous positions include senior management, general management, direct sales, marketing management, product support services worldwide, and engineering in heavy equipment industries. He is a graduate of Indiana Institute of Technology with a Bachelor of Science in Mechanical Engineering, an MBA from the University of Dallas and attended the Syracuse University Graduate School of Advanced Sales Management & Marketing program. Mr. Fry supports several charities through company benefits, some including Toys for Tots, The American Cancer Society and the Diabetes Foundation.

Airco Industries d.b.a. Photo Etch Company designs and manufactures products for the Aerospace Industry. The Company builds sophisticated integrally lighted displays and control panels for military and commercial airborne and ground based communication and navigation equipment. Concurrently, Airco has expanded and is now a leader in providing flight simulation and training components worldwide. The company has been in business since the late 1960's.
